

Participant Consent Form (Interview)

Project Title: Communication-Focused Timetabling Support System

Project Investigator: Mohid Nadeem

Project Supervisor: Neil Sculthorpe

Purpose of the Study:

This project aims to examine communication challenges within university timetabling process and to design, develop, and evaluate a prototype system focused on improving stakeholder interaction, timetable updates, and timetable slot change request management.

You are being invited to participate in this study through an interview discussing your experiences, opinions, and suggestions regarding timetable communication and scheduling processes.

Participant Agreement

Please read the statements below carefully and confirm your agreement.

- I confirm that I am aged 20 or above.
- I understand that the purpose of this research project is to investigate communication and coordination challenges within university timetabling processes and evaluate a proposed prototype solution.
- I understand that my participation is voluntary. I may withdraw my participation and submitted responses within one week after participation.
- I understand that no sensitive personal information is intentionally being collected.
- I understand that my responses will remain confidential and used only for academic purposes related to this project. The interview responses may be used within the final dissertation report in anonymized form.
- I understand that all collected information will be stored securely and used only for academic research purposes. Personally identifiable information will not be disclosed within the final report or shared outside the project.
- I agree to participate in this interview-based study.
- I understand that this interview may be recorded using Microsoft Teams to generate an automatic transcript for research purposes. I consent to the recording and transcript generation.

Yes ☐

No, I will participate but do not want to consent for recording ☐

Participant Consent Form (Prototype Evaluation Meeting)

Project Title: Communication-Focused Timetabling Support System

Project Investigator: Mohid Nadeem

Project Supervisor: Neil Sculthorpe

Purpose of the Study:

This prototype evaluation aims to assess the usability, effectiveness, and communication support features of the proposed Communication-Focused Timetabling Support System.

During the meeting, you will be asked to complete or guide a small number of timetable-related tasks using the prototype and provide feedback on your experience. Your feedback will help evaluate the prototype as part of an academic dissertation project.

Prototype Evaluation Methods

The evaluation will be conducted through an online or in-person meeting using one of the following methods. Please select one participation method for online meeting.

☐ Option 1 – Guided Demonstration (Screen Share): I will instruct the researcher which actions to perform while the researcher operates the prototype on their laptop and shares the screen.

☐ Option 2 – Remote Interaction (TeamViewer): I consent to using TeamViewer (or a similar remote-access tool) to temporarily control the prototype on the researcher's device for the purpose of completing the evaluation tasks.

Participant Agreement

Please read the following statements carefully and confirm your agreement.

- I confirm that I am aged 20 or above.
- I understand that the purpose of this research is to evaluate a prototype designed to improve communication within university timetabling processes.
- I understand that no sensitive personal information is being collected during this evaluation.
- I understand that my feedback will remain confidential and will only be used for academic purposes related to this project. Any quotations included in the dissertation will be anonymised.
- I understand that any information collected during the evaluation will be stored securely and will not be shared outside this research project.
- I agree to participate in this prototype evaluation session.
- I understand that this interview may be recorded using Microsoft Teams to generate an automatic transcript for research purposes. I consent to the recording and transcript generation.

Yes ☐

No, I will participate but do not want to consent for recording ☐
